

Preventing the Unimaginable

Prepared Originally
For
The Governor's School and College
Security Conference
Connecticut, March 2008

Physical Security Measures Used Exclusively

- Physical security measures, although essential to overall school safety, when used **exclusively**, lead to such student perceptions as:
 - *They are **unsafe** in the school*
 - *The school is a repressive environment*
 - *The school is a hostile environment*
 - *Students are basically prisoners in the school*
 - *There is good reason to be fearful while at school*

Absenteeism and Academic Success

- Learning requires that **students** be in class **physically and emotionally**
 - Absent because of sickness
 - Absent because of “vacations”
 - Absent because of being fearful
 - “Opt out” to visit the nurse or guidance
- Learning requires that **educators** be present, available and use engaging and ethical methods

U.S. Department Of Justice Research

- Violence in middle and high schools
 - Largest proportion of violent incidents began with a relatively minor affront
 - Teasing
 - Name-calling
 - Exclusion
 - Escalation from minor affronts to more serious acts

Dangerous “Weapons” In School: Direct Negative Impact on Learning

- Words! The silent and most devastating weapons
 - Putdowns
 - Slurs
 - Threats
- Hurtful language heard daily by 90% of school community, most commonly:
 - Gender related
 - Non-heterosexual
 - Racial, and religious groups
 - Special education

A Familiar Nursery Rhyme: Unfortunate Myth...And Reality

“Sticks and stones can break your bones, but names will never hurt you.”

“Sticks and stones will break my bones...And Words CAN Hurt Forever.”

Words ***DO*** hurt

Columbine As Crucible . . .

- Since 1974, 65 school shootings have occurred:
 - 1970s 3 shootings
 - 1980s 5 shootings (1 per year from '85 – '89)
 - 1992 3 shootings
 - 1993 2 shootings
 - 1994 3 shootings
 - 1995 3 shootings
 - 1996 4 shootings
 - 1997 4 shootings
 - 1998 4 shootings
 - 1999 5 shootings

...And This Decade

- 2000 4 shootings
- 2001 6 shootings
- 2002 2 shootings
- 2003 3 shootings
- 2004 0 shootings
- 2005 2 shootings
- 2006 4 shootings
- 2007 5 shootings
- 2008 3 shootings (to date)

Prevention and Intervention

- Prevention: to be ready, pro-active and anticipate circumstances that will hinder potential concerns **before** they happen
- Intervention: to enter in or come between two or more individuals or circumstances **after** something has occurred

School Shooters: What They All Share

- Five necessary (not sufficient conditions)
 - Marginalized by their peers; experienced horrific peer cruelty
 - Teased, ridiculed, excluded, threatened, physical abuse, etc.
 - Subjected to homophobic slurs
 - Under the “radar screen”
 - Marginalized by the adults who could have helped them
 - No caring adult they could count on
 - Personal problems
 - Mental health conditions
 - Family instability
 - Very rigid parameters (school climate) for being acceptable
 - Being “different” is not acceptable
 - Easy access to guns

It Doesn't Matter Where A Person Stands
Religiously, Philosophically or Morally:
Language That Hurts Must Stop

“Whether a [boy or] girl is or isn't gay is less important than if and when homophobia is used as a weapon against a [boy or] girl to put [him or] her down and isolate [him or] her.”

Rosalind Wiseman, Queen Bees & Wannabes

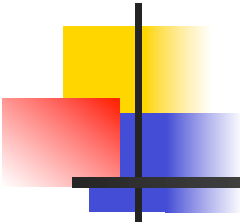

School Shooters: What They All Share

Voices of the Children: In Their Own Words

Honor the “Spirit” (intent) of the law, not merely the “Letter” of the law to create truly physically, emotionally and intellectually safe and positive learning environments for every single school community member, student and adult alike.

Role Of Faculty/Staff: Essential Elements

- Speaking up
 - Immediately
 - Consistently
- Vocal and visible to violations
 - Degrading/mean-spirited language
 - Slurs
 - Harassing conduct
- Intervening
 - Classrooms
 - Halls
 - Cafeteria
 - Bathrooms
 - Buses
 - Playing fields
 - Everywhere!

'BULLY' and 'BULLYING' are OUT!!!

“Mean” Is A Better Way To Go

Any act of [cruelty] by peers [or adults] that compromises the safety of the person being targeted for that [cruelty] in any way has a tremendous and long-lasting negative impact on a student [or adult].

In various studies, 80-90% of students claim to have been harassed or abused by peers.

Fun is only fun if everybody involved agrees that it's fun. Even without malicious intent, if it hurts, if it's mean, if it excludes, if it frightens, it will impact a person's sense of safety.

Jane Bluestein, Creating Emotionally

Safe Schools

“Negligent Privacy”

“Negligent privacy occurs when those who supervise and monitor children do not remain vigilant and unwittingly provide the opportunity for victimization to occur. Negligent privacy can occur on a playground filled with second graders, in a crowded high school cafeteria, during a youth group camping trip or even 10 feet away from a teacher in a classroom. Simply put, negligent privacy occurs when adults are not paying close attention to children under their care.”

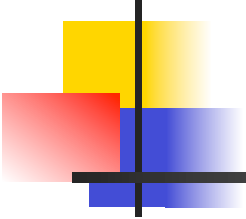

Weakfish: Bullying Through the Eyes of a Child by Michael Dorn, p. 62

Adult Modeling: *We Are All Models...We might As Well Be Good Ones*

- Language Use
- Moral Behavior
- Demonstrating Compassion
- Elements of Respect
- Listening
- Mentorship, not Friendship
- Conflict Resolution
- Display of Common Courtesy

Climates Of Respect: Safe Learning Communities

Not an add-on: a **necessity**

Schools and community organizations should be modeling the best, not perpetrating the worst

The Nature Of Respect

- Respect is an *earned quality*:
 - *First*, Adult toward Adult
 - *Second*, Adult toward Child
 - *Third*, Child toward Adult
 - *Finally*, Child toward Child

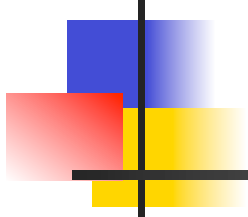

The Elements Of Respect: What it *Looks, Feels and Sounds* Like

Respect entails . . .

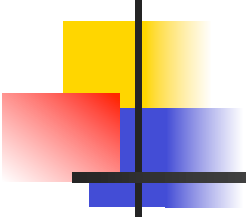

- Common courtesy
- Using given or chosen names (not street names)
- Real listening (not *just waiting to talk*)
- Willingness to address, rather than ignore, difficult issues
- Capacity for empathy/compassion/caring
- Treating others fairly and appropriately
- Being honest, forthright and trustworthy
- Understanding and accepting of differences
- Recognizing that everyone, including adults, are fallible
- Learning to give honest apologies

The Power Of Connection To School

“When students feel they are a part of school, say they are treated fairly by teachers, and feel close to people at school, they are healthier and more likely to succeed.”

“Improving the Odds: The Untapped Power of Schools to Improve the Health of Teens.” April 2002

School Connectedness: Simple Measures

- I feel close to people at this school
- I am happy to be at this school
- I feel like I am part of this school
- The teachers at this school treat students fairly
- I feel safe (*physically, emotionally and intellectually*) in this school

Connections To School

Research from [The National Longitudinal Study of Adolescent Health](#) has shown a [strong](#) association between [school connectedness](#) and every [risk](#) behavior studied.

- Students who feel connected to school are less likely to use substances
 - Students who feel connected to school experience less emotional distress
 - Students who feel connected to school engage in less violent or deviant behavior
 - Students who feel connected to school are less likely to become pregnant

Students Who Feel Connected to School Experience Less Emotional Distress

Students Who Feel Connected to School Are Less Likely to Become Pregnant

Students Who Feel Connected to School are Less Likely to Use Substances

Students Who Feel Connected to School Engage in Less Violent or Deviant Behavior

Success For Students In School

Single most important factor
determining success is
students' perception that their
teacher(s) like(s) them

Factors Associated with School Connectedness: *SCHOOL CLIMATE & CLASSROOM MANAGEMENT*

The single strongest association with
connectedness was *school climate*

Kids feel engaged when the classroom environment
is seen as a **safe** place

- 1) Physically
- 2) Emotionally (no peer cruelty/bullying)
- 3) Intellectually/academically (no ridicule
for taking academic risks: not to
feel a failure...this is often the least
attended to)

Factors Associated with School Connectedness: SCHOOL POLICIES

- No single school policy was associated with connectedness
- A climate of harsh discipline is associated with lower school connectedness
 - It is possible to write policies to make connectedness *not* happen
- Zero tolerance policies tend to be unevenly applied
- The more punitive the policies, the less connected students feel

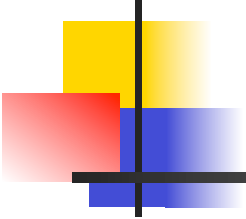

Factors Associated with School Connectedness: THE SCHOOL

- School size mattered (larger than 1,200 students matters)
...classroom size did not
- School type is not associated with connectedness
...public, private, parochial
- Location of school is not associated with connectedness
...urban, suburban, rural

The Quality of School Climate: It is *All* About Relationships

- Determined by: ***how well the people within the school treat each other***
 - Physically
 - Emotionally
 - Intellectually
 - Actions
 - Verbal and non-verbal exchanges
 - Tone of voice
 - Using inherent power advantages

A Positive and Respectful School Climate is one that is *physically, emotionally and intellectually* safe for *all* school community members... which is the antithesis of a school that is “violent”

The “Golden Rule” as the
ultimate measure:

*Treat others the way in
which you would wish to be
treated*

Even Better...

The *Platinum* Rule:
Treat others the way
they wish you would
treat them

We can create these kinds of schools, but only if we demonstrate leadership – only if we stand up and speak up for civility and respect. We can create schools where every single child and adult feels respected and valued.
